

Technology Team

Project 1

Title:	Team Elemental
Developed by/Contact info:	Logan Williams (skateboardlorwilliams@gmail.com) Courtney Taylor (cretaylor@gmail.com), Kaylon McGhee (kaylonm@gmail.com)
Location/School:	Pershing High School
Grade Level	11 th Grade
Design Team Membership:	Technology Design Team
IT/STEM Tools Used:	Alice Programming Environment
Project Overview:	<p>The Team Elemental project started out as a game and morphed into a video. The video has a story involving typical fantasy characters. The workload was split up between the three members so that one student did the storyline, another the character movement, and the remaining one did the programming. This presented a problem as you cannot merge different programs in Alice. The students resolved it by using some methods they learned at Pershing High School: They storyboarded the project, then while two members were working on storyline and dialog, the other did the programming.</p>
